Abhishek Srinivasan

Frontend Developer

I am an aspiring frontend developer and a UI/UX designer continiously looking to learn new things. I am outgoing, dedicated and open-minded. I get across to people and adjust to changes with ease. I believe that person should work on developing their professional skills and learning new things all the time. Currently, I am looking for an internship to enhance my existing skills and to gain more knowledge about the work environment.

SKILLS

HMTL   CSS   SASS   JavaScript   ReactJS
Python   NPM   Figma
Algorithms and Data Structures   Acting
Video Editing   Public Speaking   Photography

PERSONAL PROJECTS

Number Luck (06/2021 - 06/2021)
- A basic number quessing game which is made completley using pure JavaScript and specially DOM mainpulation. This was basically my first project using JavaScript when I first finished a course on JavaScript

Weatheroid (09/2021 - 06/2021)
- On this website, you can find all the necessary weather details like wind speed, precipitation, cloud cover and many more of a particular city you search in a single page without going to multiple pages, also with a very clean and user-friendly UI.

Spotify Clone (Android Version (06/2021 - 06/2021)
- I tried making Spotify Android clone entirely on HTML and CSS along with SASS as a preprocessor, backed with NPM packages. I also used various devDependencies like Concatenate, Autoprefixer, Node-sass and Post-cli.

UnBlock Website Design (08/2021 - 08/2021)
- This website is made entirely using HTML/CSS along with SASS. I used various techniques like flexbox and Grid system to style the components. Its just a basic design website I made to practise myself to get my hands clean with HTML/CSS and SASS as preprocessor.
